J. GUILD

LANGFORD U.F.A.

A meeting of the above was held on March 27th. Minutes read and adopted. Correspondence read and disposed of.

Five new members were enrolled.

The Secretary was instructed to send an itemized list of the doctor's charges, re the case of sleeping sickness, to central office, and ask for their advice as to they consider to be reasonable charges in the above case.

It was resolved that this Local go on record as being in favor of provincial political action.

Secretary was instructed to obtain prices on machine oil from firms.

Adjourned.

N. Court, Sec.

Most of the farmers are getting pretty anxious to get "on" to the land now. In many cases some plowing has to done, which had to be left undone last Fall on account of winter being so early.

BREEZELETS

"Would you like to pay \$10.00 for a forty-ounce liquor prescription?" asks a news heading.

No, not to cents for some of the stuff served out for liquor.

Premier Stewart has announced that when he talks of a bone-dry province he means one in which liquor even in straight medicinal purposes will be prohibited.

In that case, the "bone-dry" can be boiled down for liquor for medicinal purposes.

A big gold stampede to Snake Creek near Okotoks, is the latest sensation.

"Snake" Creek is suggestive of a too big a dose of bug-juice of an old soak, who saw things.

Now watch the wild-cattling and "the one born every minute" bite.

Members of the Alberta legislature have decided that it would be very "wise" to raise their own minimum salary for school teachers in this province.

But at the same time they have decided that it would be very "wise" to raise their own minimum sessional allowance from \$1500 to \$2000. A pretty "wise" bunch, aren't they?

A break in the weather is promised.

Unless there is a break pretty soon the weather will break thousands of farmers.

The Winnipeg strike leaders complain that the judge and jury men in their case were biased.

Well, that's what most law-breakers complain about. According to their theory, the "unbiased" judge and jury should free every law-breaker.

The supreme court has decided that newsprint is not a necessity of life.

Yes, but the supreme court has overlooked the fact, that newsprint is a necessity of life to the newspaper man.

The Alberta government proposes to bolster up the E. D. & B. C. railway with another cool one million dollars.

From the first the E. D. & B. C. has been a sink-hole for Alberta's millions of dollars, and has been a white elephant to the province.

Germany has overstepped the mark in the Ruhr zone.

And the French army has stepped several miles further into Germany.

Feed Situation**A VERY SERIOUS PROBLEM**

In the provincial house, the Hon. Duncan Marshall, minister of agriculture, made the startling announcement, that the government had reached the end of its resources in providing hay and feed for farmers throughout the province who are short of it, and warned individual farmers that they must bend every effort to obtain feed for themselves.

Some months ago, the Hon. Duncan Marshall, minister of agriculture, took a jaunt east to Ontario, at the expense of the province, for the ostensible purpose of purchasing feed and making ample provision for supplying the shortage that was known to exist and would be very acute before spring in the drought stricken areas of Alberta, upon the assurance of which the farmers in these areas largely depended upon. Either the hon. minister did not make sufficient provision for the needs, or he was not sufficiently acquainted with the real extent of the feed shortage and what amount of it would be required. From the remarks of the hon. minister it may be inferred that Alberta's surplus supply of feed is exhausted, and that the government is up against it in procuring any more.

If the government is up against it, what must most of the farmers in the drought areas be up against?—practically watching their stock dying of starvation—aggravated by the long and late spell of winter—and their lands lying uncultivated, because of their dead and dying horses.

The hon. minister warns the farmers to bend every effort in procuring feed themselves. Good advice—as far as it goes, but the hon. minister fails to tell them—even if it is possible to procure any—how they are going to get it without the cash. It's like telling a drowning man to save himself or he'll lose his life—and not throwing out the life-line and helping to rescue him. If the farmer, who has no money, can procure feed, will the government find the cash? If not, the hon. minister's advice isn't worth the paper its written on.

It pretty cold comfort to the farmer who has no money to get his feed elsewhere, at this stage, because the government is at the end of its resources, just at the most critical time of his need, for his spring work and seeding.

Germany mixed up in Irish situation, it is claimed.

Both Germany and Ireland seems determined to be trouble-makers, as though the world hadn't enough troubles already.

CHINOOK BREEZES

Yanhook—At Chinook, March 27th, to Mr. and Mrs. R. Vanhook, a daughter.

Myrtle school re-opened this week, with A. St. C. Nicholson as teacher.

Mrs. Richard Stewart and son Harold returned from Saskatoon on Wednesday.

Mrs. Yeats has gone to Drumheller to visit for a month or two with her daughter there.

Mr. and Mrs. Finlay Robertson of Coltholme, who have been to the Coast for some time, returned home this week.

Mr. and Mrs. J. Wright Lawrence returned last week from Nelson, B.C., where they have spent the winter.

Mr. and Mrs. Wm. Agar entertained a merry party on April 1st at their nice and commodious home.

Misses Florence and Ruth Rogers attended the teachers' convention being held at Calgary this week.

Mr. Lorne Proudfoot was a Calgary visitor last week, looking up farm help, in which he was successful.

Regular meeting of the ladies' aid will be held on Wednesday, April 14th, in the dining room of the hotel. A full attendance is requested.

Chinook has been exceptionally busy this week. Looked like old times to see such a large number of farmers doing business in town.

At the whist drive, under the auspices of the ladies curling club, the first prize for gentlemen was won by Mr. Harper; ladies, first by Blanche Deman, Mildred Hamon and Mrs. Lawrence tied for next, but in the draw the latter won out.

The Easter services on Sunday in the Chinook church were well attended. Quite a number were present at the special session of the Sunday school in the afternoon. Also at the evening service, when the pastor, Rev. G. H. Elliott, preached an appropriate and inspiring sermon. The special Easter music by the choir was exceptionally fine.

This memorably long winter of 1919-20 has left its mark on the horses and cattle that have lived through it. The horses, owing to the crusts on the snow, have had a particularly hard time, and very many in this district, more especially the colts and old horses, have died. It is to be hoped that Mr. Smith will have in a full line of collar sweat pads this spring, as there will be lots needed.

Chinook Agricultural Society

A meeting of the directors of the above society was held in the school-house on April 3rd.

Minutes read and adopted. Secretary was instructed to advertise for the table taken from the agricultural hall.

Jno Key was appointed a committee to meet Coltholme council requesting a grant.

Secretary was instructed to write Sounding Creek council for a grant of \$200, the same as is given by Coltholme M.D.

Secretary was also requested to write Golden Centre council, asking for a grant.

Secretary and N. F. Marcy were appointed to wait upon the Chinook council, asking a grant.

As requested by Dr. Chandler, the lady directors were asked to make a suggestion for his special prize.

The thanks of the members of this society were extended to Mr. Neil McLenn for so kindly representing this society at the Alta Fairs Assn. convention at his own expense and for his report on the convention.

The four additional classes in the prize list were approved.

It was decided to advertise the grain fields competition, so that the farmers can get prepared to take part in this competition next year.

It was left with the grounds committee to arrange for a gate-keeper to collect a percentage of gate receipts.

F. E. Foster was appointed to see that the doors on the agri'l building be repaired and kept locked, and anyone wishing to go in shall apply to F. E. Foster for the keys.

It was decided to have a refreshment booth on the grounds and that the right be reserved for the Society only.

Secretary was instructed to enquire if Mr. J. A. McColl will donate, sell or rent his granary which is adjacent to the agri'l grounds.

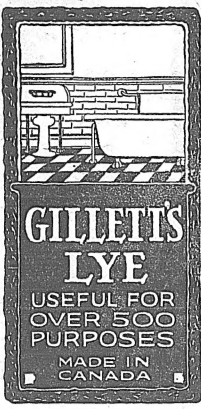

Following bills were paid:
W. A. Cruickshank 16.00
E. O. Hocart 5.00
M. E. Rogers, telephones 2.35
Can. Nor. Town Properties 25.15
Adjourned.

The Chinook rest-room (in the old bank building) is expected to be ready for opening by next Saturday.

Watch Repairing

I have been appointed agent for Chinook for the E. D. Black Co., Calgary. Parties needing Watches and Clocks Repaired may leave same with me which will be promptly forwarded to Calgary for repairs.

MADE IN CANADA

A Big Western Problem

It is, of course, merely a trite observation, and a statement of what everybody knows, to declare that the Western Prairie Provinces of Canada have many difficult problems to solve in order to promote their maximum growth in population, wealth and general development. Neither time nor space would permit of even a mere recapitulation of these varied and complex problems, not to speak of an intelligent consideration of even a few of them.

Asked to name the first and foremost question demanding attention by the people of the West, would, no doubt, be as varied as they would be interesting. Some would say a larger population in order to develop the country, increase their production, and assist to bear the expense of the public services. Others would urge full provincial control of the natural resources in order that they might be developed for use. Others, again, would lay emphasis upon the assimilation of the foreign-born into a broad and true Canadian citizenship. Better schools and a more general education for all classes would be advocated. Some would say tariff reform, or cheaper money, were the main essentials to a betterment of conditions; while others, again, would lay stress upon social, moral and religious issues. Some practical minds would say more branch lines of railways, better roads, and a general improvement in all means of transportation.

And to a greater or less degree all these things are necessary to the welfare, growth and prosperity of the Prairie Provinces. There can be no question about that. But at the present time there looms up a problem, the solution of which would first appear to be necessary without loss of time if many of these other questions are to be satisfactorily settled. And in some respects it is the most difficult of all our problems.

We refer to the need of solving the difficulties, we might almost say the disastrous conditions, confronting thousands of settlers by reason of the drought which has afflicted sections of the West during the last three years. So long as these conditions continue a black eye is given to immigration to this country because, had advertisement thus given western Canada abroad has an adverse effect on the securing of that larger population we need and must have. It affects the credit of our people, stops railway development, cripples business and imposes heavy burdens upon municipalities and governments. Something better than the provision of temporary relief to the direct sufferers must be found.

Those who are perhaps best qualified to judge, believe the only solution is to be found in a radical change in farming methods in these districts, and the substitution of other crops, in part at least, for the all grain crops

which have, for the most part, been attempted in the past. It is asserted that even in these drought afflicted areas, a few farmers have been able to succeed, where the majority have failed, by reason of the fact that they followed other methods.

In the years of drought, there was not only failure of grain crops, but also of grass, with the result that there was neither food for man nor feed for stock. On the other hand, some farmers were successful even in these years of lack of moisture in raising green corn and other kinds of feed for stock when even the grasses failed. What they succeeded in doing, their neighbors could also do.

It is suggested, therefore, and wisely it would seem, that steps should be taken to bring the actual experience of these men, and the methods followed by them, to the knowledge of the people generally in the districts referred to, not by books or pamphlets, but by these men telling the story of their experiences and success to groups of farmers throughout these areas.

It is also being urged that the combined knowledge of the agricultural experts of the country should be brought to bear in an effort to solve this problem.

These experts and scientific agriculturists on experimental farms and elsewhere have evolved earlier ripening varieties of grain in order to escape the loss occasioned by frosts. Along this line they have met with splendid success and the loss from frost, which formerly was a constant dread of the farmer, has been enormously decreased. Has the time not arrived when the energies of all these men should be turned into the channel of endeavoring to evolve a drought-resisting variety of wheat and other grains?

There are countries even more seriously affected with drought than western Canada, which, nevertheless, are succeeding agriculturally. Surely from these lands varieties of grains can be secured to be tested experimentally here.

Something must be done, and done soon, to create new conditions in the areas referred to, or else they will have to be abandoned as unfitted for agricultural settlement, with all that will mean, not only in individual loss to the people there, but to the whole country. It is impossible to go on, hoping against hope that "next year" will yield a crop, and in the event of disappointment reliance upon the government for food, fuel, clothing and next season's seed, and the removal of stock to greener pastures. The country has about reached the end of this unsatisfactory policy; something more permanent, more constructive, that will put new hope into men's hearts, must be forthcoming.

Old Garments New When Diamond Dye

Shabby, Faded, Old Apparel Turns Fresh and Colorful

Don't worry about perfect results. Use "Diamond Dye," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods, - dresses, blouses, stockings, skirts, children's clothes, feathers, draperies, coverings - everything.

The Direction Book with each package tells how to Diamond Dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

Completing Hudson Bay Line
The Winnipeg board of trade has been notified by the federal government that it will cost \$400,000 to complete the Hudson Bay Railway. Up to the present 332 miles of the line have been built and about 90 miles of track are still required to bring the road to its ocean terminus at Port Nelson. The Dominion government is not yet in a position to say how much money it will be able to devote to the Bay line this year. The West is pressing for completion.

Our Senses Are Untrustworthy

Scientific Development Is Making Rapid Strides in These Modern Days

Though many disagree with the views held by Sir Oliver Lodge as to the life to come, few will challenge his right to be numbered among the select few who have changed radically the views of educated men-hold as to the physical side of the universe. Anything he cares to say as to electronics, matter, the ether, is worthy of attention, and must furnish food for reflection. A few days since, in the course of a lecture to an audience which filled the spacious Carnegie Hall in New York, he said, raising a small wooden table: "This appears to be solid," and waving his arm in the air, "this appears to be empty; it is exactly opposite. You may not believe it, but it is true."

Such men as Soddy, Rutherford, John Cox, Thomson, and many other physicists tell us that our senses, cultivated but to serve certain vital uses, deceive us in everything which does not touch on the daily needs of corporeal existence. They speak with certainty on the electrical basis of matter; tell of a mysterious ether, which permeating all, is yet imperceptible to our senses; they show that our notions of such things as heat, light and sound are founded on hypotheses that are fundamentally false and hence misleading, until the layman finds his head reeling and his confidence in the knowledge he had acquired as a lad slipping away.

The discovery of radium has strengthened the standing of geology, because it permits of a vastly extended time-scale. The earth is no longer regarded as a world gradually growing cooler. It has in its known store of radium a source of heat which will last, not for a mere million years, but probably for tens of thousands of million years. It is possible that the real danger to the planet will come from too high an internal temperature, rather than from one too low. The world, in other words, is more likely to finish in explosion than as a dry, frozen body, as our forefathers believed. But as such a catastrophe is not hardly possible sooner than in about a million years this need not cause any particular uneasiness to the present earth folk.

The subject is much too vast for more than a mention, and those who are sufficiently interested should read what has been written on it by the men of science named in the foregoing - there is quite a voluminous literature to be consulted. But, very recently, another surprise has been sprung, quite as significant as any previous theory of the ether, matter and matter, and of this there is as yet little to be learned from books, it being the last-born of science. - Winnipeg Free Press.

JOY AND GLADNESS FOR THE CHILDREN

Every child - whether it be poor or rich - is entitled to joy and gladness. Health is the birthright of all and there is absolutely no doubt that the healthy baby is a happy baby. It is a baby's nature to be happy - not cross. Only the sickly baby is cross. The well child is a joy to the home - a laughing, giggling, happy little piece of humanity which drives dull care from the household. The sickly baby is the opposite - his cross and peevish cries are a great deal and a source of constant worry to the mother. But mothers there is no need of your little ones being sick. By regulate the baby's bowels and sweeten his stomach with a gentle but thorough laxative and baby will soon be well and happy again. Thousands of mothers have proved this through their use of Baby's Own Tablets - there is a smile in every dose of the Tablets. Give them to your baby and make him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams Medicine Co., Brockville, Ont.

Wireless for Irish Cities

Cutting of Telegraph and Telephone Wires Causing Trouble
In consequence of the frequency with which telegraph and telephone wires in Ireland are being cut, the government has decided on an extensive use of wireless telegraphy, there, says the Daily Mail.
Naval signalmen are being employed to start the system and the newspaper intimates that portable telephones with a radius of about 30 miles are being employed in transmitting messages from one police station to another or between adjacent towns. It is asserted that the system has proved satisfactory.

The Profiter: I don't see the sense in the wife being so anxious to buy a kimono. Why, she couldn't play the bloomin' instrument if she'd got it.

Minard's Liniment Cures Burns, Etc.

HEAVY WORK

Your horses pull heavy loads over all kinds of roads - make their work easy - save your harness and wagon.

Imperial Mica Axle Grease

prevents friction in the hub. As the mica flakes work into the pores of the axle and hub, the rough surfaces are smoothed with a hard filling of mica. The grease on the glassy surface insures thorough lubrication. Sold in sizes from a one pound tin to a barrel.

Imperial Eureka Harness Oil

makes leather strong, pliable and waterproof. Prevents cracking and breaking of stitches - cannot be rubbed off. It gives leather a rich black, lasting finish.

Sold in pint, quart, half-gallon, gallon and four-gallon sealed cans, half-barrels and barrels.

Protecting the Armenians

Public Will Not Tolerate Abandonment of the Armenians to Destruction

The only possible solution appears to be to make France the mandatory for Cilicia, if she will undertake the task. Cilicia used to be known as Lesser Armenia, and the remainder of its Armenian inhabitants must be protected. In the Sykes-Picot agreement Cilicia was included in the French "zone," while the Treaty of London gave France much more extensive authority in Anatolia. As for Armenia proper, it is understood that the plan is to link up the Turkish vilayets of Bitlis, Van, and Erzerum with the Armenian republic of Erivan, in Transcaucasia. With sufficient help, such an Armenian State may be able to hold its own. The one thing the public will not tolerate is the abandonment of the Armenians to destruction. Mr. Lloyd George told the Armenian citizens of Manchester in 1918 that "those responsible for the government of this country are not unmindful of their responsibilities to your martyred race." The time has come to recall these responsibilities, incurred under the Treaty of Berlin and the Cyprus Convention, and still undischarged. Albania is threatened with obliteration, though the last word on the Albanian question is not yet said. Armenia must not share a like doom, or what becomes of our crusade for the salvation of the small nations? - From the London Times.

Canadian Flax Trade Growing

Proposed to Encourage the Establishment of Spinning Mills in Canada

At a meeting of the Canadian Flax-Growers' Association, held in London Ontario, recently, the members discussed a plan to extend the organization. It was pointed out that the acreage under flax has been more than doubled since the start of the war, and the quality of the Canadian seed and fiber demonstrated not only in Ireland, but all over the world. In view of this it is proposed to encourage the establishment of spinning mills in Canada on a large scale; also to bring experienced weavers to Canada from Ireland and start the industry on a sound basis. The final decision on this matter was left over until the June meeting. Several growers are in favor of having the flax seed graded. They will ask the Dominion government to impose such restrictions on the sale of flax that the quality of all Canadian seed put on the world market will be the best possible.

No matter how little a man believes in religion, he detests irreverence in a woman.

W. N. U. 1310

Exchange Situation Impetus for Settlers

Americans Taking Good Advantage Of Rate of Exchange in Buying Farms

One of the results of the present high Canadian exchange has been made apparent during the last few weeks. Americans intending to settle in Western Canada are leaving the United States sooner than they planned and in much larger numbers than was expected. The exchange situation has proved a stimulant to American settlement in Western Canada, because the settlers find they can gain from \$1.25 to \$4 an acre in purchasing land. Many Americans who had purchased farms when exchange was normal, and had money in the banks, have taken advantage of the low quotation of Canada's money, and cleared off their deferred payments, making a large saving.

Americans of means are paying cash for their farms. With the rate of exchange as it is today, the saving on a quarter-section of land at \$35 an acre is about \$840, which is quite an item on a \$5,600 transaction, while the ready money thus put into circulation is having a beneficial effect throughout the west, both on investments and general trade.

Minard's Liniment Relieves Neuralgia.

Predicts Rush Into Peace River Area

Oil Fields Greatest in World Says Lieut.-Col. J. K. Cornwall

Ottawa.-The summer of 1920 promises to see the greatest rush into the Peace River country that has ever been seen in any section of Canada. It is the prediction of Lieut.-Col. J. K. Cornwall, who is here conferring with government departments in connection with matters of interest to the north country. Col. Cornwall, probably the best known figure in Peace River, and a trapper and trader of 25 years' activities in the north, has been attending the fair sale at Montreal, where, prices soared to a point that placed the fur industry of Peace River on a new high pedestal. "Watch the Peace River this year," said the

Oxo Cubes contain the rich nourishment of prime beef in so compact and convenient a form that they are handy for use anywhere, at any time. Just a cube-hot water-and a biscuit or two-and a light sustaining meal is ready.

BORSALINO MEN'S HATS

"WILL OUTWEAR TWO HATS OF ANY MAKE"

ALL STYLES-ALL COLORS-SEE YOUR LOCAL DEALER

The Seal of a Piano is the Action OTTO HIGEL PIANO ACTIONS

enthusiastic Colonel, "will there be oil discovered? - I certainly expect so. As a matter of fact, my opinion is that the year 1920 will see the opening in that north country of the greatest oil fields in the world. Texas, in my view, will virtually fade away in comparison with the result that this fall and early spring the Peace River country will be in the throes of an oil stampede into the north that has had no precedent in this continent."

Hero: I've had my nose broken in two places.
Sweet Thing: Well, you shouldn't have gone into those places.

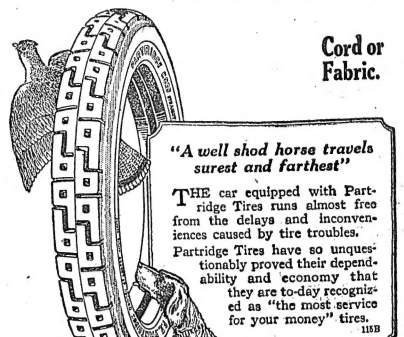

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Rheumatism, Aching Joints, Lumbago, Sciatica, Neuralgia, and for Headache, Neuritis, Toothache, Earache, take Aspirin marked with the name "Bayer" or Aspirin. You are not taking Aspirin at all. Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real Aspirin - the genuine Aspirin prescribed by physicians for over fifteen years. Now made in Canada. Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin - "Bayer" - You must say "Bayer" Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic acid of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to evade the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

One Trial of Grape-Nuts

will do more than many words to convince you of the goodness of this wheat and barley food.

But it's worth saying that Grape-Nuts contains all the nutriment of the grains, is ready to eat, requires no sugar and there's no waste.

Grape-Nuts is a Builder

U.S. Censored For Interference In Irish Question

London.—The United States was handled without gloves by Premier Lloyd George and Sir Edward Carson, the Ulster Leader, in the debate in the house of commons on the second reading of the Irish bill. The premier said it was action such as that taken by the United States senate in adopting the Irish resolution that had fostered secession.

"De Valera is putting forth the same views in the same words that Jefferson Davis used," the premier declared, and added that such a movement has led to civil war.

"We are doing nothing more than the United States claimed for themselves," he continued, "and will stand no less."

Sir Edward Carson, in opening the debate, said he believed that the Irish members were committed, "not by my countrymen but by ill-conditioned Americans, misled by Sinn Fein propaganda, which," he exclaimed, pointed to the government, "you are doing nothing to counteract."

"Do you suppose that if I worked against the bill and it was killed and the 1914 act becomes effective, I could call upon my followers to get their rifles to maintain our position in the six Ulster counties, when this bill gives us the right to control these counties?" asked Sir Edward Carson.

He declared that Mr. Asquith, by his proposals for amending the 1914 measure, "killed his own child," which was so distasteful to Ulster.

He promised that Ulster would do the best it could under the two-parliament plan.

Premier Lloyd George also attacked the Asquith plan, saying that it was leading to the proclamation of an Irish republic and secession.

Win. Adamson, labor leader, said he was opposed to the bill and that his followers had adhered to his decision in a vote, but he did not outline any definite plan for a solution. He stated his personal views, which, he said, should not be confused with the views of his party, as he had not placed them before the leaders of Labor. He was for one parliament with full powers for everything, except defence and foreign affairs, and for immediately calling a constituent assembly.

The second reading of the bill was passed by 348 to 94. Those who voted against it included Mr. Asquith and his following among the independent Liberals, the Irish Nationalists and a few Unionists.

The attendance for the vote was the largest during the present session.

Plot to Murder Carson
Montreal.—The Montreal Star publishes the following cable from London:

"During the debate on the Irish Home Rule bill, Sir Edward Carson, the Ulster leader, said he had been warned by Scotland Yard that Clana-Gael members had landed from the United States with the avowed intention of assassinating him."

To Represent Italy
Copenhagen.—General Albrecht, former minister of war, has been appointed to represent Italy on the inter-allied commission at Constantinople.

Asquith Makes An Attack On Home Rule Bill

London.—Herbert H. Asquith, former premier and advocate of a one-parliament Ireland, took issue in the house of commons on the home rule question with Premier Lloyd George, whose plan for two parliaments for Ireland Mr. Asquith has characterized as absolutely unacceptable.

Particular interest is centered in the contest between the premier and former premier, both of whom aspire to the leadership of the liberal party. But as yet they have not come to grips.

The fact that agitation is so widespread in Ireland at the present time lends added interest to the ultimate outcome of the bill now before the house, but the real fight will not be on until the committee stage has been reached.

Threaten Strike in Germany

Labor Unions of Essen Will Call A General Strike Unless All Demands Granted

Rotterdam.—A despatch to the Rotterdam Courant from Essen says the representatives of the labor unions and of the three Socialist parties have issued an ultimatum to the government threatening a general strike in all Germany unless their demands are granted.

The demands are: First, binding the government to recognition of the resolutions passed at Bielefeld; second, abolition of military measures contrary to the resolutions, and third, the recall of Gen. Von Watten and granting forty-eight hours in which to carry out the Bielefeld armistice terms.

Only Rumors That Wheat Is Hauled to U.S.

Acting Premier Declares Government Cannot Act Without Proper Confirmation

Ottawa.—Answering Thos. MacNutt, Saltcoats, in the commons, Sir George Foster stated that the government had heard that some farmers were shipping their wheat to points near the United States boundary and then hauling it in wagons across the line to secure higher prices. However, neither the government nor the wheat board had heard any more than rumors of such action and therefore could not hold these farmers to account for anything they had received above the board's fixed prices for wheat. The holders of participation certificates, Mr. MacNutt was informed, would not receive any allowance to compensate them for the reduction in value of such certificates by reason of reduced prices for seed wheat, allowed on compassionate grounds to farmers in dried-out areas.

Cost of Hudson Bay Road

Over Three Hundred Miles of Steel Have Been Laid On The Line

Ottawa.—In reply to Mr. Campbell in the house, the minister of railways said that 322 miles of steel had been laid on the Hudson Bay Railway. There were 92 miles still to be laid. The total expenditures of the railway at the end of the last fiscal year was \$13,900,387 and on the terminals \$6,344,499.

The estimated cost of completing the track-laying into Port Nelson was \$1,750,000, but to complete the railway would require \$4,000,000.

Signals From Mars

Paris.—Belief that the strange signals picked up by wireless stations recently came from the planet Mars, is expressed by Camille Flammarion, the famous astronomer. He thinks inter-stellar communication may yet become a realized fact, but he is inclined to believe it will be accomplished by the use of some magnetic force which is not as yet developed.

Urges Completion Of Hudson Bay Road

Minister of Railways Promised Western Members That Matter Would Be Discussed

Ottawa.—Arguing that if the government could set aside \$5,000,000 for the construction of the Welland Canal, it can at least set aside \$2,000,000 for the completion of the Hudson Bay Railway, a score or more of western members held a conference with Hon. J. D. Reid, minister of railways, and Hon. A. L. Sifton, secretary of state. While little hope was held out that the wish of the delegation would be met this year, the minister of railways and canals promised to bring the matter up in the house for a full and frank discussion on the relative merits of both propositions named. The delegation again urged that the Hudson Bay road was a national project and should be treated entirely as such.

In reply to an argument by the minister that the Welland Canal was deteriorating because of non-completion, the delegates pointed out that exactly the same argument applied to their project. It was also pointed out that \$777,000 had been set aside for the Trent Canal scheme, which project the delegates classed as merely a "pleasure ditch."

Going back to the Welland Canal argument, it was contended that this scheme would not be of any real use until the St. Lawrence canal scheme was finished, and as yet it had not got past the survey stage.

Settlement of Palestine

Jews and Arabs to Co-operate in Restoration of the Holy Land

New York.—Speedy settlement of political difficulties in Palestine by co-operation of Jews and Arabs in restoration of the Holy Land, is expected as the result of the Palestine Jewry's request for Arab aid, according to announcement here by the Zionist organization of America. The organization received a despatch from the Zionist commission in Palestine stating that Vaid Hasman, the representative body of Palestine Jewry, had issued a manifesto to the Arabs explaining the Zionist aspirations in the Holy Land, and asking them to exploit or injure the Jews. But will prove poultry "not all," and asking them to co-operate.

Cleveland to Chicago in Two Hours
Cleveland.—The speed record for many of the air lines between Cleveland and Chicago was broken today when Pilot James H. Knight covered the 340 miles to this city in two hours and ten minutes, an average speed of 137 miles an hour. The previous record was two hours and twelve minutes, was also held by Knight, made several weeks ago.

Golsheviki Lose Heavily
Warsaw.—Russian Bolshevik forces which have been attacking the Polish front in Poland, have suffered severe losses, and at points have had to withdraw to the eastward, says an official statement issued at army headquarters. Polish troops have pursued the enemy, and have re-taken territory which was lost in the savage fighting of last week, it is said.

Will Distribute Canadian Guns

Ottawa.—The guns which are being landed at Halifax will be distributed to the active militia all over Canada, said General Ashton, adjutant-general at militia headquarters of Canada. Canada sent her artillery over during the war and it is now returned. It is required to equip artillery units throughout the Dominion.

French Loan to Be Floated in Canada
Paris.—The Municipal Council today voted to float a loan of \$20,000,000 in Canada, repayable in ten years. The proceeds will be used to purchase merchandise in Canada.

Indians in Canada

Ottawa.—Lucien Cannon, Dorchester, was informed that there are 105,998 Indians in Canada; there are 1,625 reserves, and a grand total of 38,101 buildings on these reserves.

Holland Retains Ex-Kaiser

Reply With Regard to Former German Emperor Agreed to By Allies

London.—The allied powers have accepted Holland's last note regarding the former German emperor, according to an Amsterdam despatch to the Daily Mail.

The Dutch government on March 5 for the second time refused to deliver the former German emperor to the allies for trial. This determination was set forth in a note to the British premier, who, however, declared the Dutch government would take all necessary measures to minimize the liberty of Wilhelm and prevent him from endangering the peace of the world.

The determination stated that preparations to this end would be taken "on the spot." It was assumed that this meant a close guard over the former kaiser and a strict censorship would be instituted while Wilhelm occupied his estate at Doorn.

To Help Convicted Men

Winnipeg Labor Men to Discuss Means of Releasing Strike Leaders

Winnipeg.—More than 700 delegates, representing Winnipeg labor organizations, will meet April 11 to discuss ways and means to effect the release of convicted strike leaders, James Law, secretary of the defence committee, announced.

It is possible that representatives of labor organizations from other cities and towns, both east and west, will attend the convention, Mr. Law said. Many enquiries have been received from outside points as to what the committee intends to do.

The defence committee are now caring for the dependents of the convicted leaders. These dependents total 29.

Shorter Hours for Nurses

Winnipeg.—An eight-hour day, 56 hour week, has been instituted for the nurses in training at the General hospital. This is the first of the reforms in the training school, and will later, if possible, include an afternoon "week off." There is a shortage of applicants for training for nurses and those in charge are planning to make conditions of training more attractive. It is a step in the campaign for student pay.

Fast Time Again

Confusion Said to Result From Adoption of Summer Time

Toronto.—There is considerable confusion in Canadian border cities and towns, and generally throughout Canada in industries having direct Canadian States connections, following daylight saving time being inaugurated in New York and other border states. The mix-up will probably continue, more or less, during the month of April.

On May 2, the cities of Montreal, Toronto and Ottawa will adopt the daylight saving time locally. Niagara Falls, Ont., and other frontier points are running on the new time already. It is not expected that the federal or any of the provincial governments of Canada will take up daylight saving this year as a Dominion or provincial measure. The railways have so far made no definite move in the matter.

Turks Destroy Railway Bridge

Constantinople.—The Nationalists have destroyed an important railway bridge at Bilejik, on the line between Constantinople and Aleppo. The British are now restoring it. The destruction of the bridge isolated a small detachment of Punjab, but it is expected they will come out safely in a few days.

Lebanon Declares Independence

Washington.—Lebanon, in Asiatic Turkey, has declared its independence of Prince Feisal's government, the state department was advised by the United States consulate at Beirut. A flag similar to the French tricolor, but with the Cedar prominently displayed was chosen and a constitution is being drawn up.

Big Increase in Customs

Ottawa.—An increase of more than \$10,000,000 in customs revenues over last year is reported by H. Bertram, collector of customs for this city, in a report covering the year just ended.

Hoover for President

San Francisco.—Herbert Hoover has telegraphed to the Hoover Republican club of California that he would accept the Republican nomination for President "if it is felt that the issues necessitate it and it is demanded of me."

W. N. U. 1310

Will Declare State of War To Be at End

Price of Flour May Advance

Action of Wheat Board in Continuing Restriction Is Said to Be The Reason

Ottawa.—A material advance in the price of flour is indicated in an announcement made here on behalf of Canadian millers by George A. McDonald, representing the Quaker Oats Company and head of a delegation of representative millers, which waited on the government to discuss the serious situation which Canadian mills are facing as a result of the action of the Canadian wheat board in continuing the restriction in the price of flour on the Canadian market, and the lack of export markets for Canadian flour.

The increase will be necessary to meet the increased cost of manufacture. The scarcity of mill feeds in Canada is directly traceable to the lack of a market for flour and to consequent decrease in the volume of domestic milling, the millers stated. They have asked the government to modify the regulations of the wheat board and to co-operate with the millers in inducing foreign buyers to take a reasonable proportion of Canadian wheat as flour rather than as wheat.

Vast quantities of flour are said to be available in the United States for export and this complicates the Canadian problem.

It is said that more than 4,000 men already have been thrown out of employment by the forced closing down of some of the mills of which there are about 500 in Canada.

Germany Will Behave

Promises France to Live Up to Terms Of Treaty in Regard to Ruhr District

Paris.—Assurances have been given by the German government that it will not send into the Ruhr valley more regular troops than are allowed and declared no more such troops would be sent there without authorization from the allies.

Receiving members of the French press, M. Millerand declared that if the Germans violated the terms of the treaty by sending a strong armed force into the Ruhr district, France would occupy part of the neutral zone whether the allies agreed or not.

Mayor of Cork

Cork.—At a special meeting of the Cork corporation Alderman MacSweeney was elected Lord Mayor. He is a Sinn Fein leader and several times has been deported or imprisoned.

Big Deficit On National Railways Is Announced

Ottawa.—In a comprehensive speech, Dr. Reid, minister of railways, laid before the house the first annual budget of the government railway system since its inauguration. His statement has been daily waited and was followed with interest by all sides of the house.

He gave in detail the financial result of the year's operations, outlined the needs of the road in the future, stated their program for the coming year. It discussed the vital question of the suggested increase in freight rates.

The year's work showed an operating deficit on government roads of \$14,000,000, namely: Canadian Northern, \$6,500,000; I.C.R. and Transcontinental, \$7,500,000. To this there had been added \$19,000,000 for fixed charges or a total deficit for the year (including fixed charges) of \$33,000,000.

In comparison the operating deficit of the roads in 1918 (the Canadian Northern was then in private hands) was \$2,134,000.

Revenue, too, had advanced nearly \$12,000,000. But, so Dr. Reid explained to the house, operating expenses had increased from \$84,000,000 to practically \$108,000,000. The advance in operating expenses were largely due to increases in wages granted under the McAdoo award.

In all this, however, Dr. Reid did not take the Grand Trunk Pacific (of which the government is in possession)

Washington.—Peace with Germany by adoption of a joint resolution declaring the war at an end, was put squarely before congress by representatives in control of the house. Framed by Republican members of the foreign affairs committee and by party leaders, the measure was thrown in the hopper with as little ceremony as if it had been a bridge bill, but instantly there developed a demand for speedy action. A move to jam it through the house took shape, but Democrats, outspoken in their opposition, finally obtained an agreement to postpone consideration.

While trying to work a resolution calculated to suit all factions of their party, Republican committee men had arranged to call it up immediately. The resolution introduced by chairman Foster, of the foreign affairs committee, pressed for termination of a state of war as soon as it becomes effective. It provides also for reciprocal trading with Germany under certain reservations and for a repeal of the president's war powers. Germany would be allowed 45 days to notify the president that it has declared a termination of war and waived all claims against the United States. "that it would not have had the right to assert had the United States" ratified the "Treaty of Versailles."

Upon Germany's failure to send such notification, trading, or the making of loans or credits would be prohibited except with the license of the president. Republican members of the foreign affairs committee, to which the resolution was referred without comment, worked in conference for more than five hours before they mapped out a measure designed to overcome all party objections. The committee is expected to report it to the house. After chairman Campbell, of the rules committee, had announced that the resolution would be taken up immediately, with four hours set aside for debate, Democrats objected and asked for more time in which to study and digest the full text.

This resulted in a hasty conference between Republican steering committee and minority leaders, it finally being agreed to defer consideration for a few days.

Grand Duchesse Olga to Reside In Denmark

Constantinople.—The Grand Duchesse Olga of Russia, sister of former Emperor Nicholas of Russia has left for Serbia, en route to Denmark, where she will reside permanently. She still firmly believes her brother and his family are alive.

From deficits Dr. Reid passed to suggested increases in freight rates. It is in this regard, probably that his whole statement will awaken the widest public interest. There was the point to be considered, he said, that any increase of rates on government lines would apply equally well to the Canadian Pacific Railway. Should therefore, Dr. Reid asked, freight rates be generally increased for the particular purpose of enabling the Canadian National railway system to meet operating expenses and fixed charges? An increase of say 25 per cent in rates would mean an additional charge on the public of \$88,000,000, approximately.

"Whether" Dr. Reid pursued, "we shall take \$88,000,000 in increased freight rates out of the people of Canada, to show a surplus for the National system, which I myself am not prepared to take the responsibility of deciding either one way or the other." He would leave it to the consideration of the house and the people of Canada.

"Save the surface and you save all Paint & Varnish"

Safeguard Your Roof

THE roof is an important item—it "makes" or "mars" the whole structure. In shingle-roofed houses it is even more necessary to see that it is in good regular repair, because once a roof commences to decay a general deterioration of house-value is the immediate result. To ensure a permanent durability, as well as an added appearance, use

B-H Shingle Stain

either as a mixture in which shingles are dipped or as a stain to apply to the completed roof. It comes in all colors, and gives a tough, durable "seasoning," besides contributing largely to the artistic effect of your home. Like every other B-H product, the B-H Shingle Stain is first choice among people who know good paint.

An Appeal For Scoutmasters

Ex-Soldiers Are Asked to Offer Their Services in Training the Men Of the Future

Commander in the Service—To you, who have already proved your patriotism, by serving your country, I want to appeal now for a further step—that is, to train a few boys to be good men for their country, like yourself.

You know by sight the Boy Scout, with his bare knees, hat and staff. Well, the Boy Scout Movement, for which I speak, has over 250,000 boys in training now, and the testimonials from public men of every branch of government, army and navy, churches, education, etc., coupled with the constantly increasing calls upon us by the public service for Scouts, prove that we are working on lines that are of national value, and therefore worth while.

But our numbers and efficiency have been limited during the war by the want of officers in the movement, since seventy per cent. of the men and all our older boys joined up for service.

In spite of this, however, we have been going ahead all the time. The work of training a smart troop of useful enthusiasts is a fascinating game when once you have taken it up—the boys respond so quickly to your ideas.

But it is not only good fun; now that the fighting is over it is the best work that a man can do for his country, at a time when juvenile crime is more rampant than it has been, and when, before the nation, there lies a time of danger and change for which an exceptionally sound, well-trained body of citizens will be invaluable.

The real victory of the war lies not so much in superiority on the battlefield as in the ability of our country to keep its end up in the struggle that is upon us.

That's what we are aiming for in training the Scouts to be efficient citizens, without regard to class or creed. The boys everywhere are eager and willing enough. We appeal for men to come and help them in their spare time, on their return to civilian life.

The work is easy, and interesting, and is generally carried on in evenings and on half holidays. We are keen and very happy brotherhood. Will you join us?

You can come for a short time or permanently as you may feel inclined. In any case I shall be very pleased personally to hear from you and will gladly send you further information as to how best you can help.

Yours truly,
ROBERT BADEN POWELL.
For further information write to your respective provincial Scout Headquarters.

Western Development

Alberta-British Columbia Industrial Congress in June

Speakers representing the largest business interests on this continent and thoroughly familiar with the resources of Western Canada will be heard at the sessions of the Alberta-British Columbia Congress which will be held in these two provinces from June 2 to 10. The management of the congress which will take the form of a tour through Alberta and British Columbia, with visits to all important centres, are making preparations for a gathering which will be much larger in every way than that of last year. Every effort is being made to have the delegates set for themselves the possibilities which lie in the undeveloped natural resources of the country and to hear really informative addresses from acknowledged authorities.

Either was known to the earliest settlers.

In Defence Of The Empire

American Writer Tells How Britons Pay the Price

The Saturday Evening Post (Philadelphia) says—The astounding fact is that today the Union Jack flies over more than one-quarter of the land area of the globe. One has heard in addition the claim that "Britannia rules the waves!"

I spent a week last September in Devon, the southwest of England, making headquarters at a village inn high up on the wild and desolate country of Dartmoor. Walking one day down a long sunken road we came finally to a tiny and ancient village called Meacehay.

There was a little public house in which the oak table and benches were black and battered with centuries of use, and a village church the stonework of which would indicate it might date back almost to Norman times.

Under a huge hew tree in the old churchyard stood a new tombstone in the form of a truncated pyramid. On one side of it was cut: "Thomas Atkinson, late Sergeant-Major Royal Artillery," who died in November, 1918, aged seventy-eight. On the three other sides were recorded the death of the old man's four sons. One had been killed in China some years ago. The three others had fallen in France. The dates of their deaths marked the progress of the war.

They were all men past the first flush of youth. One had fallen in 1916; one the next year; and the last, a man in his late forties, had been killed in action in October, less than a month before the Armistice.

It was no strain on the imagination to picture the paternal veteran of early years standing aloof after shock until, when his last son was killed in Flanders, he, too, gave up the fight. There in that remote and forgotten village churchyard was written in little for the casual stranger the whole story of the price of empire. Reading it, one realized that what one may call British boyhoodness—if he wishes based on a solid and somber foundation of fact.

Government Ships To Hudson Bay

Western Provinces Will Insist on Opening Up of the Northern Sea Route

In connection with the Government's shipbuilding policy, and a government-owned railway, there lies a time of danger and change for which an exceptionally sound, well-trained body of citizens will be invaluable. The real victory of the war lies not so much in superiority on the battlefield as in the ability of our country to keep its end up in the struggle that is upon us. That's what we are aiming for in training the Scouts to be efficient citizens, without regard to class or creed. The boys everywhere are eager and willing enough. We appeal for men to come and help them in their spare time, on their return to civilian life. The work is easy, and interesting, and is generally carried on in evenings and on half holidays. We are keen and very happy brotherhood. Will you join us? You can come for a short time or permanently as you may feel inclined. In any case I shall be very pleased personally to hear from you and will gladly send you further information as to how best you can help.

Yours truly,
ROBERT BADEN POWELL.

A Real Non-Skid Tire

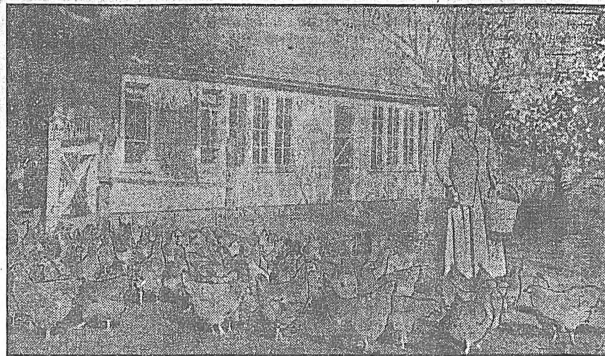

British Engineer Believes He Has At Last Solved The Problem

Legions of inventions have been made to prevent the skidding of rubber tires, but no one device can be said to be completely satisfactory, either in obviating skidding or in avoiding damage to the roadway and to the tire itself. Chains, studs and all sorts of rubber protruberances have been tried without real success. A British engineer has, however, been working along much simpler and more scientific lines, with most promising results. His notion is to shape the tire so that when it is in contact with the road it lies flat with a definite edge on each side. Any tendency to skid is resisted by the "squeeze" action of the tire in this position. Trials have shown that incipient skids are quickly checked and that the tire wears well and has no bad effect on road surfaces.

Often a man's character would be unable to recognize his reputation if they were to meet.

W. N. U. 1310

Poultry Raising As A Vacation

Although the value of poultry and poultry products in the three prairie provinces have amounted to more than twelve and a half million dollars in 1919, it cannot be said that the poultry industry in these provinces is anything more than a side line with the majority of farmers. The high prices paid for eggs during the last few years, however, has caused farmers to turn their attention to the possibilities of poultry raising as a means of increasing their income.

This is shown by the interest which is being taken in the teachings of the agricultural colleges and the Dominion and Provincial Government experimental farms throughout the country. Farmers are looking for advice regarding poultry, and are endeavoring to put into practice the valuable information made available by the agricultural colleges and experimental farms.

The work that is being done at the Dominion Experimental Farm at Lethbridge, Alberta, is characteristic of what similar institutions throughout the country are doing, and indicates the enormous profit possibilities poultry raising in the prairie provinces offers, if the profession is taken seriously. At this farm a return of no less than \$90 weekly is being received from a flock of 220 hens which require but part of the time of one man to look after them.

The value of the poultry at the Lethbridge Experimental Farm is measured by the number of eggs a hen lays. Many of the best birds at the farm would not stand very high in the estimation of a judge at a poultry show. But they are egg producers and eggs mean more revenue to the farmer, and it is the object of the experimental farm to teach the farmer methods that will produce more revenue.

May Establish New Industry

Pea Canning Is Possible Industry for Southern Alberta

Pea Canning as an industry is one that offers splendid prospects for the irrigated districts of Southern Alberta, according to a report submitted to the new industry committee of the Lethbridge Board of Trade.

The report reads part as follows: "It has been demonstrated that garden and field peas can be matured here as easily and as abundantly as in almost any other country, and especially in our irrigated districts. With our long growing season, so free from late spring and summer frosts, the pea crop is nearly always dependable, and there is no reason why a substantial crop cannot be matured each year."

The report goes on to argue that a pea canning industry in this district would be profitable. This would be particularly if the farmers had a direct interest in the business. The history of the pea canning industry is that it soon grows into a profitable concern, as the maintenance is inexpensive.

A Real Non-Skid Tire

British Engineer Believes He Has At Last Solved The Problem

Legions of inventions have been made to prevent the skidding of rubber tires, but no one device can be said to be completely satisfactory, either in obviating skidding or in avoiding damage to the roadway and to the tire itself. Chains, studs and all sorts of rubber protruberances have been tried without real success. A British engineer has, however, been working along much simpler and more scientific lines, with most promising results. His notion is to shape the tire so that when it is in contact with the road it lies flat with a definite edge on each side. Any tendency to skid is resisted by the "squeeze" action of the tire in this position. Trials have shown that incipient skids are quickly checked and that the tire wears well and has no bad effect on road surfaces.

Cedars were introduced in England in 1683 purely as an ornament.

But they are egg producers and eggs mean more revenue to the farmer, and it is the object of the experimental farm to teach the farmer methods that will produce more revenue.

The flock which produces such satisfactory results has been got together by intelligent selection of the proved laying strains. The birds are barred plymouth rocks. In 1918 Mr. C. A. Crossfield, who is in charge of the experimental station at Lethbridge, transacted about 150 hens. Of these 94 hens which had laid more than 150 eggs during 1918, included 37 which produced 200 and more, were selected. These were mated with cockerels of a good egg producing strain, and out of the hatchings of last spring 220 pullets were taken. These 220 birds were divided into flocks of fifty-five each and penned together in the fall.

One lot was placed in the pen last October, a month earlier than the rest. These fifty-five hens netted a profit of \$11.2 each during the month of December. They laid 1,083 eggs—more than 90 dozen—which were sold wholesale at 90c a dozen. Every hen laid during the month. One pullet laid thirty eggs during the thirty-one days. Many others laid twenty-five and twenty-six each in the same period. The average number of eggs laid by the pullets in this pen during the month was somewhat less than twenty eggs each.

The pens for the other birds were not ready until the middle of November, and the results in December were not quite so good as in the one just mentioned. They were, however, very satisfactory. All but seventeen hens laid. One hen laid thirty eggs, yield-

Soldiers and Militarists

Intelligence Has Great Deal To Do With Making a Successful General

The more that is written about Marshal Foch and the other leaders in the allied armies, the more it becomes apparent that intelligence has a great deal to do with making a successful general. Foch was not an officer with much experience of actual warfare, and as a matter of fact what distinction he had won came from the excellence of his work at the Ecole Supérieure de Guerre. But for years he had done two things: he had studied military history with the most minute care, and after that had pondered deeply what he had read. He went upon the basis that there must be a reason for everything, and proceeded to search for that reason in military history. As an example, we may take his study of the operations in the war of 1866; doing so, one perceives at once that Foch has sought the rule underlying the majority of tactical and strategic operations, and has sought to make that rule available for future soldiers. One of the most interesting features of Foch's two books is the freedom with which he criticizes von Moltke and the German general staff when it seems proper to do so. If we look at the matter impartially, and are willing to judge by results, we must acknowledge the vital importance of the well-educated officer and of an efficient general staff. The study, reading, information and thought requisite to the direction of military operations are not always recognized by the civilian, nor does he understand how little militaristic are good soldiers.

Farmers' Income Taxes

That the farmers of Canada have contributed only \$389,011 out of \$83,768,110 collected during the four years the income tax has been in operation, was the statement of T. B. Patton, income tax adjuster and adviser in an address before the Kiwanis Club at Regina.

Happiness doesn't live at the end of the road; she's a gypsy, wandering with us unseen; ready at our call to share with us her gladness.

A New Arctic Trade Route

Steamer Halvar Pioneer Craft in Opening Up New Route of Commerce

A report from Sweden that the Swedish Commercial & Shipping Co. is planning another trading venture next summer in Siberian waters, indicates that the steamer Halvar, which Capt. Albrecht Ellsen took some months ago from Sweden to the mouth of the Ob River and home again, was the pioneer craft in opening up a new route of commerce. It is hardly a route that will attract pleasure travelers, judging by the experience of the small English expedition that accompanied the Halvar, which is said several times to have thought seriously of dropping out because of the great masses of ice that the adventurers encountered. Yet the opinion of Captain Ellsen, whose technical observations have brought his charts of the route up to date, is that a modern steamer can make the trip without much apprehension of serious danger. More than that, he considers that a substantial trade over this Arctic route can be developed between Sweden and Siberia, although the condition of the Siberian harbors is anything but satisfactory to the navigator. At the Siberian end of the route the trade would tap the grain production of the Omsk and Tomsk districts and the metals of the Urals, to say nothing of other Siberian products and the further fact that coal of as good a quality as that of the English east coast, is obtainable in quantity near the large rivers. And a vessel starting from Sweden could profitably load a cargo of almost anything that Sweden produces.

Koreans Will Never Yield to Japanese

"People Will Not Win for Years, But They Will Never Waver," Says Baron Kim

Shanghai.—The Koreans will suffer extermination before they will acquiesce in the rule of Japan, declares Baron Kim Ka-chin, formerly one of Korea's elder statesmen and officials, who has penetrated the Japanese cordon around Korea. He is now one of the members of the little community of Korean refugees who have found haven here in China.

"There can be no peace," he said. "The Koreans will never waver. They may not win for many years, but they will never yield."

He declared that the people are entirely without rights and without political representation. All special privileges are in the hands of the Japanese, he added, and they control all the sources of wealth and rapidly are acquiring actual ownership of the land. The Korean nation, he said, is without a mouthpiece, for, as asserted, not one Korean newspaper edited by Koreans is permitted to exist, and public meetings are wholly forbidden. "Not more than three persons, even for social purposes, may gather and talk together," he said. "All the schools of the country are under the direction of Japanese teachers, and the instruction is given in the Japanese language from Japanese textbooks."

He said that the history that is taught to children is garbled in such a way as to glorify Japan and discredit Korea.

"Japan's course," he declared, "has been driven the people out of Korea into Manchuria at the rate of 100,000 a year. This is because the Japanese have taken control of everything. They operate the railways, the banks, transportation lines and customs offices, and in those few places where there are Korean officials the Japanese adviser is never far distant."

"Even the Japanese riksha coolies are favored, for they are permitted to solicit fares at exits of railway stations and other places from which the Korean riksha men are barred."

The Nile River

So far only the upper and lower courses of the Nile River are navigable throughout the entire year. The six cataracts, which extend 1,000 miles with long stretches of smooth water between them, prevent the middle Nile from being navigable except at very high flood.

Daylight Saving

The Vancouver City council has formally endorsed the principle of daylight saving and will in all probability exercise the power of local option in adopting it, provided the legislature extends the same privilege in that respect as last year.

Hats were never worn before the 15th Century.

A close student of human nature seldom tends money to his friends.

Expect Prosperous Fruit Season

British Columbia Growers Are Preparing For A Big Year

This year will be the greatest year in history for small fruits in the Fraser Valley, recently stated Hon. E. D. Barrow, minister of agriculture for that province, after receiving reports on the subject. "Contracts have been offered by the canners from as far east as Toronto and across the line for all the fruit that the Fraser Valley can produce, and for four hundred tons more than its entire estimated crop for this year. That means if not a single berry is shipped for table consumption to Vancouver or to the prairies, the Fraser Valley small fruit growers will still be four hundred tons short of the market," stated the minister.

Fruit canners are not feeling any alarm over the sugar shortage as refineries in British Columbia have given their assurances that they will be able to take care of the province's need in that direction. A generous offer from the Board of Commerce at Ottawa has also been made if any signs of a sugar shortage should occur during the canning season.

British Wireless Telephony

Transmit Messages to Aircraft Up To 30 Miles Away

After the signing of the Armistice the British authorities established a postal telephone service to Cologne and in connection with this service, systematic use was made of wireless telephony. Wireless telephone stations were placed on the ground at distances of 50 miles from each other and with the use of quite small sets were able to transmit messages to aircraft up to 30 miles away. They could also receive from the air to about 50 miles. Frequently these distances were exceeded and an aeroplane was in communication at one and the same time with three stations. Considering the small size of apparatus employed, these were remarkable results and testify to the rapid progress made by the British Air Service since the first trials of wireless telephony to aeroplanes in 1915.

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes were Percherons. The greatest breed of draft horses in North America are Percherons. The safest investment in draft horses today is Percherons. A profit to own—A pleasure to handle.

You will make no mistake in your horse breeding this year if you use a Percheron sire.

BAR U AND NAMAKA FARM PERCHERONS

The largest stud of the Pure-bred Percherons in the world. The Bar U Percheron-breeding Farm Established in Canada. The only firm in the American continent from which British horsemen have selected Percheron breeding stock to establish studs in Britain.

Do not let the British breeders come to Canada and carry off all our best foundation stock. Do not be satisfied with the cheap cull stallions brought in by irresponsible dealers and stallion peddlars from the United States, when you can have the best individuals of the best breeding raised right here in Alberta by men that have been in the breeding business for 25 years, and expect to remain in the business. We have seventy-four head of Pure-bred Percheron Stallions of our own breeding now on hand to select from. You can see their sire and dam, and if you cannot chase them from the lot to suit you we will give you every assistance in our power. Write for prices or come to Calgary, Alberta, and we will meet you and show you the stock at any time—Admission Free.

GEORGE LANE (Desk B.), CALGARY, ALBERTA

Wantmore Peanut Candy

Boil three cups of sugar in one cup of water until it hardens when dropped into water; flavor with lemon, then add one and a half cups of Wantmore Blanched Salted Peanuts chopped fine. Stir well. Have ready a hot dish or pan freely buttered, and pour candy in. Spread over smooth surface to make a thin candy. Be sure and use Wantmore's Wantmore Salted Peanuts, as no other peanuts will make it as good.

Allies Borrowing From Argentine

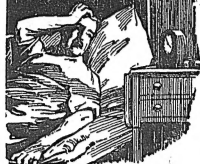

Britain, France and Italy Share Loan For Wheat Purchase

Announcement that negotiations for Argentina's loan of \$200,000,000 to Great Britain, France and Italy had been completed was made yesterday by Carlos A. Tornquist, high commissioner of finance of Argentina, on his arrival from Europe on the steamer Lapland.

Great Britain and France each received 40 per cent. and Italy 20 per cent. of the loan, which, he said, is for the purpose of financing purchases of wheat, beef and other foodstuffs in the South American country.

British Bullion Reaches America

Gold bullion valued at two millions pounds sterling, to be used in paying interest on Anglo-French bonds, due next October, arrived in New York on the steamer Lapland. The consignment, the first to be sent here from Great Britain for this purpose, it was said, was consigned to J. P. Morgan and Company.

Will Morning Never Come

DOES this illustration picture your experience?

What is more distressing than being unable to sleep?

Sleeplessness is one of the first and most certain symptoms of exhausted nerves.

This is the warning that you need the assistance of Dr. Chase's Nerve Food to restore vigor to the nerve cells and thereby avoid the development of serious nervous trouble.

By improving the quality of the blood and building up the nervous system this food brings new energy and strength to the whole body.

British Won In Espionage Game

Counter System Completely Paralyzed Hun Spies in England

The London Morning Post published recently an interesting record of Germany's spy system and Great Britain's counter-espionage organization which was so efficient by the summer of 1915 that seven German spies were taken in one fortnight, paralyzing Germany's schemes to re-establish her spy service in Great Britain. A feather in the cap of the British organization was the capture of two Dutchmen named Janssen and Roos. Suspicions were aroused concerning them on account of numerous telegrams they despatched from naval ports to The Hague, apparently ordering cigars. This was remarkable as sailors are not in the habit of ordering cigars, so the senders were arrested.

Janssen and Roos, when examined, claimed to be travelers on behalf of the Dieckmans company of The Hague. Under further examination they gave contradictory explanations, and the prosecution showed that the address of the Dieckmans company was the same as the headquarters of the German secret service in Holland. Next day Roos endeavored to commit suicide by cutting his manacled wrists on the broken glass of a door. The cigar code was found to refer to naval secrets, Habannas meaning light cruisers and Coronas battleships. Janssen and Roos were convicted and shot on a miniature rifle range in the grounds of the Tower. They faced the firing parties with bravery. Neutral spies from Holland and elsewhere thus learned that an espionage mission in England was attended with the greatest difficulties. Thenceforward Germany only sent casual spies, who pretended to be commercial travelers, and tried to get away before their movements aroused suspicion.

Minard's Liniment Cures Dandruff.

Blank Prospect

"Two bags and a hatbox," said the tourist who was travelling for the first time in Scotland, on arriving at a little wayside station. The porter mournfully collected the articles and put them on board a cab. "And, by way, porter," said the passenger, "what do they usually give you here for a tip?"

The porter jerked his thumb over his shoulder. "See you big hoose in among the trees?" he asked.

"Yes, but what has that to do with it?"

"Weel, that's the workhouse, and it's fit 'o' old railway porters," Argonaut.

She Tells Just Why They Are So Popular

MRS. OAKES SPEAKS IN PRAISE OF DODD'S KIDNEY PILLS

She had severe backache before using Dodd's Kidney Pills, but now she says she is quite well again. "I had, in April, 1915 (Special), among the women in this section who are shouting the praises of Dodd's Kidney Pills is Mrs. John Oakes, one of our highly respected residents. Nor does Mrs. Oakes fail to give the reason.

"Before using Dodd's Kidney Pills," she states, "I suffered with severe backaches. Now I am quite well again."

"I am highly pleased with Dodd's Kidney Pills. They have given me the best of satisfaction. In those last two sentences Mrs. Oakes gives the reason why Dodd's Kidney Pills are so universally popular with the women of Canada. They give satisfaction. Women in all parts of Canada are every day stating that they suffered from kidney ills and found relief in Dodd's Kidney Pills. If you haven't used Dodd's Kidney Pills ask your neighbors about them. They have been in use in Canada for more than a quarter of a century and have earned a place in the family medicine chest almost everywhere.

General Botha As Campaigner

During the Boer War He Used No Maps

How General Botha, one of the South African bulwarks of the British Empire during the world war, carried on his campaign against Great Britain during the Boer War, is told by The Contemporary Review. "During the Boer war he used no maps. He worked entirely by rote, by swift calculation, by keenness of eye, by knowledge of the country, by rapid perception of the lie of the land, and by the difference between dry wet land, marching places and halting places, and so forth. Yet his instincts were extraordinarily sound. One of his aides-de-camp said that Botha had only once been caught out, and that was when he allowed his own judgment to be out-weighted by that of his staff."

Dairying in Manitoba

Value of Dairy Products For the Year

Amounted to \$16,789,892.51

Manitoba has long been recognized, with 22,000 milk and cream shippers, and present indications for increased production of dairy products in the province are exceedingly encouraging.

During the year 1919 a number of new silos were erected at different parts of the province. These have been filled with corn, green oats, and peas, which makes a succulent and good cheap feed for milk cows.

The total value of dairy products for the year amounted to \$16,789,892.51. The increased production, combined with the increased price, amounted to \$5,001,719.25. The increase in dairying is more noticeable in the Southern part of the province, where grain growing has been carried on for 25 or 30 years. There appears to be a marked change towards more mixed farming in this part of Manitoba.

Former Emperor Starts Moving

Part of former Emperor William's personal baggage has been moved from Benckise Castle, where he is living at present to Doorn, where he is soon to take up his residence. A large number of trunks, most of which had not been opened since the former emperor's arrival here have been taken to Doorn in motor trucks. Moving day for Count Hohenlohe is expected to be May 1.

SPRING IMPURITIES MEAN WEAK BLOOD

A Tonic Medicine Is a Necessity At This Season

Dr. Williams' Pink Pills are an all-round tonic, blood builder and nerve strengthener. But they are especially valuable in the spring when the system is clogged with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching. In the spring one feels weak and tired. Dr. Williams' Pink Pills give strength. In the spring the appetite is poor. Dr. Williams' Pink Pills improve the appetite, tone the stomach and aid weak digestion. It is in the spring that the blood is most often found an outlet in disfiguring pimples, eruptions and boils. Dr. Williams' Pink Pills speedily clear the skin because they go to the root of the trouble in the blood. In spring anaemia, indigestion, neuralgia, rheumatism and many other troubles are persistent because of weak, watery blood and it is at this time when all nature takes on new life that the blood most seriously needs attention. Among those who have proved the value of Dr. Williams' Pink Pills is Mr. Arthur D. Armstrong, Trenton, N.J., who says:—"For a number of years I was bothered with pimples which would break out on my face and body. The trouble was always worse in the spring, and although I tried different treatments, it was without much success. In the spring of two years ago the trouble was worse than usual, and although I was taking medicine it did not help me until I finally decided to try Dr. Williams' Pink Pills. Under this treatment the pimples disappeared, and there has since been absolutely no return of the trouble."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or sent by mail to Dr. Williams Medical Co., Brockville, Ont.

Seeding Prospects Fair

Good Supply of Wheat, Oats and Barley Seed in West

Ottawa—Seeding prospects in the prairie provinces are very fair as far as can be judged at this early date, it is stated in reports to the department of agriculture. There is a good supply of wheat, oats and barley seed in the west. It is fairly well distributed and in good condition.

Good fall rains were reported from most districts, and nowhere is it anticipated that there will be insufficient moisture for germination. Some districts are fairly dry and depend for their crops on weather conditions early in the season.

In giving out these details, Dr. J. H. Crisdale, deputy minister of agriculture, stated that no difficulty is anticipated in distributing seed. There is sufficient to meet every demand and it will be available where it is required.

Crop prospects throughout the Dominion are apparently good at this date.

Catarrah Cannot be Cured

By LOCAL APPLICATIONS, as they can't reach the seat of the disease. Catarrah is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE will cure catarrah. It is taken internally and acts through the blood on the seat of the disease. HALL'S CATARRH MEDICINE is composed of purest ingredients and is the only medicine that will cure catarrah. The perfect condition of the ingredients in HALL'S CATARRH MEDICINE is what produces such wonderful results in catarrah. Druggists 75c. Testimonials free. P. J. Cherry & Co., Props., Toledo, Ohio.

Dairy Business Increases

Swift Current Increases Output By Over Six Hundred Per Cent.

The Swift Current plant of the Saskatchewan Creamery Company reports an increase of over six hundred per cent. in the business done during the first ten weeks of this year, as compared with that of the corresponding period in 1919. This showing is all the more remarkable since Swift Current is in the heart of the so-called "dry area" of Saskatchewan, where during the past year the wheat crop was much below normal. It is accepted as evidence that while lack of rain may seriously affect grain crops, it has no apparent effect on the dairy industry. The butter output of the Swift Current plant in 1919 was 199,054 pounds, according to figures received at the dairy branch of the provincial department of agriculture.

This creamery is a branch plant of the Saskatchewan Creamery Company which has other branch plants in various parts of the province. Since January first the total output of all branches shows an increase of approximately fifty per cent. over the corresponding period last year. The faith which the company has in the future of dairying in the southern and western portions of Saskatchewan is evidenced by the fact that they are erecting new plants this year at Weyburn and Maple Creek.

"The idea of dairying at Maple Creek five years ago was a joke," says an official of the dairy branch. "These results, accomplished in dry years, ought to show the possibilities of the dairy industry in this province under normal conditions."

A will written on a table cloth was refused probate in San Francisco because Mrs. Helen Scott, who wrote it just before she died, forgot to put a date on it.

HOW TO "BE FIT" AT SIXTY

As our boys "came marching home," they brought a certain red-blooded doctrine, and showed us the glory of a perfect body. They will show us how to "keep fit," even if we have passed middle life and are beyond the athletic stage. For the tired business man, the man who feels the daily grind and the nightly fag, has meager appetite, headaches, nerves unstrung, is gloomy, ending in a soggy brain, try the right way. Get out of bed, open the window, breathe deeply, exercise the army "setting-up" exercise or use dumb bells, until in a warm glow.

Before breakfast take hot water, and occasionally castor oil or a pleasant laxative made up of May-apple, aloin, jalap, and sold by all druggists as Dr. Pierce's Pleasant Pellets.

As Prof. Strauss says, "The excretion of uric acid we are able to effect by exciting diuresis." Drink copiously of soft rain or distilled water, six or eight glasses per day, hot water before meals, and obtain Anurio Tablets, double strength, for 50 cts., at the nearest drug store and take them three times a day. If you want a trial package send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

"Anurio" (anti-uric acid) is the recent discovery of Dr. Pierce and is much more potent than lithia, for it will dissolve uric acid as hot tea dissolves sugar.

CONGOLEUM RUGS

Have you ever seen or used a Congoleum Rug? This a kind of Linoleum with a fancy border, and comes in full pieces. Let us tell you a few points about them:

- 1 They are guaranteed to give satisfaction
- 2 They are sold at a remarkably low price
- 3 They are absolutely waterproof and have a felt base
- 4 They are durable and hold their rich colors longer than a printed linoleum.
- 5 They are positively sanitary and vermin proof
- 6 They lie flat, do not kick up or curl on the edges and will give no trouble with expansion

These are made in Winnipeg, and we can sell you a rug here in Chinook the same prices you pay for it f.o.b. at Winnipeg.

These sizes are in stock: 9x10 1/2 ft, price \$22; 9x12 ft, \$25. Also just received more pieces of Linoleum. There are beautiful heavy pieces, very pretty designs, have a burlap, base, 2 yards wide, \$3 running yd, a lighter grade, tar base \$2.50 running yard. Measure up your room and we will be glad to tell you what it will cost to make your home more beautiful, your house work lighter
